

CA160

Cresta 160

The *mobile* solution for temporary or permanent air conditioning

Features and specifications

- * Power consumption of just 1770Watts gives 4.7kW of cooling (16000Btu's)
- * Power supply 240V - 1ph - 50hz
- * Rotary type compressor
- * Environmentally acceptable refrigerant R407C
- * 3.0m quick connect flexible refrigerant line
- * 24 hr timer can prepare a comfortable climate before occupation
- * Precision temperature control creates a stable, comfortable working temperature
- * 3 speed air movement fan discharging up to 750m³/hr
- * Quiet operation for minimal disturbance
- * Automatic condensate removal
- * Indoor unit weighs just 35kgs and measures D590mm x W360mm x H750mm
- * Outdoor unit weighs just 13kgs and measures D320mm x W500mm x H500mm
- * Robust plastic construction

The **Climatehire Cresta160** is a powerful mobile air conditioner with a cooling capacity of 4.7kW (16000Btu's) and is ideal for office cooling or localised cooling in a larger space. It is a split unit having an outdoor section for heat rejection which can be hung through a window, located on an outside ledge, or in some adjacent area where the rejected heat would be of no consequence, ie warehouse or factory space.

The outdoor heat rejection unit and indoor cooling unit are interconnected with a 3.0m flexible refrigerant line.

Cooling and de-humidifying at the same time, the **Cresta160** creates a cool and comfortable working environment at the turn of a switch.
