

# AC 60

## Aircool 60

The *mobile* solution for temporary or permanent comfort cooling

### Features and specifications

- \* Auto swing vertical louvres
- \* Power consumption of just 250W
- \* Power supply 240V - 1ph - 50hz
- \* Suitable for areas up to 60m<sup>2</sup>
- \* Cooling fan delivers up to 3000m<sup>3</sup>/hr
- \* Environmentally friendly operation
- \* 3 speed fan control
- \* 40lt water tank capacity
- \* Water level indicator
- \* Few moving parts means low maintenance
- \* Quiet operation for minimal disturbance
- \* Complete with castors and weighing just 24kg makes for easy moving
- \* Measures just D625mm x W543mm x H966mm

**Evaporative Coolers** can provide relief from high ambient temperatures when there is no possibility of rejecting the warm air stream given off by air conditioning equipment, temporary or permanent.

The **Climatehire Aircool60** is attractively styled and most suited to office, retail and reception areas of approximately 60m<sup>2</sup>.

Their function is an entirely natural one. Warm air is drawn by a powerful fan across a wetted mesh and the temperature is reduced by evaporation, before being discharged as a cool air stream. Evaporative coolers work best when installed in well ventilated areas.

Properly installed and operated, the **Aircool60** can provide cooling across a wide area and produce ambient temperature reductions of 5°C. It only requires connection to a 13A socket and has an internal water tank which is easily accessed for routine filling with water.
