

AC 30

AirCool 30

The **mobile** solution for temporary or permanent comfort cooling

Features and specifications

- * Power consumption of just 220W
- * Power supply 240V - 1ph - 50hz
- * Suitable for areas up to 30m²
- * Cooling fan delivers up to 1550m³/hr
- * Environmentally friendly operation
- * 3 speed fan control
- * 20lt water tank capacity
- * Water level indicator
- * Few moving parts means low maintenance
- * Quiet operation for minimal disturbance
- * Complete with castors and weighing just 21kg makes for easy moving
- * Measures just D468mm x W637mm x H1157mm (when stand mounted)

Evaporative Coolers can provide relief from high ambient temperatures when there is no possibility of rejecting the warm air stream given off by air conditioning equipment, temporary or permanent.

The **AirCoolmatation Aircool30** is attractively styled and most suited to office, retail and reception areas of approximately 30m².

Their function is an entirely natural one. Warm air is drawn by a powerful fan across a wetted mesh and the temperature is reduced by evaporation, before being discharged as a cool air stream. Evaporative coolers work best when installed in well ventilated areas.

Properly installed and operated, the **Aircool30** can provide cooling across a wide area and produce ambient temperature reductions of 5°C. It only requires connection to a 13A socket and has an internal water tank which is easily accessed for routine filling with water.
