

CA450

Cresta 450

Another mobile solution for temporary or permanent air conditioning

Features and specifications

- * Power consumption of just 1.8kW gives 4.5kW of cooling (15400Btu's)
- * Power supply 240V – 1ph – 50hz
- * Full load current 10A
- * Nominal current 7.3A
- * Environmentally acceptable refrigerant R407C
- * Up to 30m indoor/outdoor interconnecting lines
- * Simple to install and operate
- * Precision temperature control creates a stable working temperature
- * Two speed fan and adjustable outlet grille
- * Quiet operation for minimal disturbance
- * Automatic condensate removal
- * Robust metal construction
- * Portable indoor unit weighs 105kg's and measures D 330mm x W 695mm x H 954mm
- * Indoor unit noise level 54dBA
- * Outdoor unit weighs 25kg's and measures D 280mm x W 550mm x H 470mm

The Climate4Hire **Cresta 450** is a powerful mobile air conditioning unit with a cooling capacity of 4.5kW (15400Btu's) and is ideal for office or server room cooling or localized cooling in a larger space. It is a split unit having an outdoor section for heat rejection which can be hung through a window, located on an outside ledge or in some adjacent area where the rejected heat would be of no consequence, ie in a warehouse or factory space.

This type of portable air conditioner is water cooled and features an outdoor heat rejection unit which cools and re circulates water to and from the refrigerant condenser within the indoor unit. Safe because only water is contained within the small bore flexible interconnecting hoses, the **CA450** is also considerably more adaptable because of the separation distance between the indoor and outdoor units, which can be up to 30 metres.
